

Dallas Parks Plan

As part of a comprehensive facilities survey and master plan by Carter Burgess for the City of Dallas Park and Recreation Department, ARCHITEXAS prepared condition assessments and improvement recommendations for 35 of Dallas' most historic parks. ARCHITEXAS created a data base to document the research and condition assessment for each park and worked with the city archivist to catalogue historic records and drawings. The city-wide "Renaissance Plan" identified over \$2 billion in maintenance and improvement work. The city began implementing the Plan in 2004 with bond funds and ARCHITEXAS was commissioned to provide full architectural services for the restoration of three historic parks. Restoration work includes repair of park structures, furniture and landscape, and making the parks accessible and safer.

Location

Dallas, Texas

Project Duration

2003 - 2004

Cost of Construction

Lake Cliff Park \$0.7 million

Flag Pole Hill \$1.4 million

Stevens Park \$0.7 million

Scope of Services
