

Grapevine Belt Depot

ARCHITEXAS provided historic preservation and architectural services for the restoration of the Cotton Belt Depot for the Grapevine Heritage Foundation at Grapevine Heritage Park. The surviving portions of the depot were found in two locations in the community. These sections were acquired and moved back to its original location on the Cotton Belt Railroad near Main Street in Grapevine. The two sections were set in place and new reconstruction, to match the original design, joined the two original sections. The exterior and interior were restored to their original design including paint colors. The restored depot facilitates the Grapevine Heritage Museum, a Visitor's Center and future passenger depot for the Tarantula Steam Train. The depot is one building in a campus of structures that will become Grapevine's Heritage Park, which will include a farmers market, historic gardens, arts and crafts compound and future restored Cotton Belt Railroad Section House.
